## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5, 10-12, 15, 20, 21, 26-28, 34-36, 51, 52, drawn to a peptide and vaccine classified in class 530, subclass 350.
  - II. Claims 1, 6-9 and 29-33, 37-39, drawn to peptide dimer and vaccine, classified in class 530, subclass 387.3.
  - III. Claims 13, 14, 16, 17, 24, 25, 40, 41, 44, 45, drawn to method of treatment or vaccination, classified in class 424, subclass 184.1.
  - IV. Claims 18, 42 and 43, drawn to method to immunocastrate a pig, classified in class 514, subclass 2.
  - V. Claims 19, 46-50, drawn to antibodies, classified in class 530, subclass 389.1.
  - VI. Claims 22, 23, 53, 54, drawn to use of a peptide, classified in class 514, subclass 2.

Although there are no provisions under the section for "Relationship of Inventions" in M.P.E.P. §806.05 for inventive groups that are directed to different methods, restriction is deemed to be proper because these methods appear to constitute patentably distinct inventions for the following reasons: Groups III, IV, and VI are directed to methods that recite structurally and functionally distinct elements, are not required one for the other, and/or achieve different goals. Invention III requires a method of treatment or vaccination, which is not required by any of the other groups.

Invention IV requires immunocastration of a pig, which is not required by any of the other groups. Invention VI is drawn to the use of a peptide, which is not required by any of the other groups. Therefore, a search and examination of all methods in one patent application would result in an undue burden, since the searches for the methods are not co-extensive, the classification is different, and the subject matter is divergent.

Although there are no provisions under the section for "Relationship of Inventions" in M.P.E.P. §806.06 for inventive groups that are directed to different products, restriction is deemed to be proper because these products constitute patentably distinct inventions for the following reasons: Groups I, II and V are directed to products that are distinct both physically and functionally, are not required one for the other, and are therefore patentably distinct. The protein of Groups I and II can be used in materially different methods other than to make the antibody of Group V, such as in therapeutic or diagnostic methods (e.g., in screening).

Inventions I and II/IV, II and IV, III and V, IV and V/VI, V and VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together.

Inventions I and III/VI, II and III/VI are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially

Art Unit: 1647

different process of using that product (MPEP § 806.05(h)). In the instant case, the peptides of Groups I and II can be used in processes to isolate binding proteins.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, separate search requirements, and/or recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement has been traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
